

安装相关组件

```
yum install GeoIP-devel.x86_64 ncurses-devel tokyocabinet-devel openssl-devel -y
```

下载解压

```
wget https://tar.goaccess.io/goaccess-1.3.tar.gz && tar xf goaccess-1.3.tar.gz  
&& cd goaccess-1.3  
./configure --enable-utf8 --enable-geoip=legacy --prefix=/usr/local/goaccess --  
with-openssl
```

```
make && make install
```

报错:

```
./bin2c: error while loading shared libraries: libGeoIP.so.1
```

解决:

```
ln -s /usr/local/lib/libGeoIP.so* /lib64/
```

```
ln /usr/local/goaccess/bin/goaccess /usr/bin && ll /usr/bin/goaccess  
cp /usr/local/goaccess/etc/goaccess/goaccess.conf /usr/local/goaccess/etc/
```

vim /usr/local/goaccess/etc/goaccess/goaccess.conf 加入以下配置

```
time-format %T  
date-format %d/%b/%Y  
log_format %h - %^ [%d:%t %^] "%r %^:/%v/%^" %s %b "%R" "%u" %^ %^ %^ %^ %T  
%^
```
