SourceTree 是一个强大的git管理客户端，但是在使用最新版需要登录
_____

1.打开 我的电脑，在最上方的地址栏直接输入以下地址

windows下

%LocalAppData%\Atlassian\SourceTree\

mac下

~/Library/Application Support/SourceTree

2.在这个目录下新建一个名为 accounts.json 的文件，新增保存以下内容。

```json
[
    {
    "$id":"1",
    "$type":"SourceTree.Api.Host.Identity.Model.IdentityAccount,
SourceTree.Api.Host.Identity",
    "Authenticate":true,
    "HostInstance":{
        "$id":"2",
        "$type":"SourceTree.Host.Atlassianaccount.AtlassianAccountInstance,
SourceTree.Host.AtlassianAccount",
        "Host":{
            "$id":"3",
            "$type":"SourceTree.Host.Atlassianaccount.AtlassianAccountHost,
SourceTree.Host.AtlassianAccount",
            "Id":"atlassian account"
        },
        "BaseUrl":"https://id.atlassian.com/"
    },
    "Credentials":{
        "$id":"4",
        "$type":"SourceTree.Model.BasicAuthCredentials, SourceTree.Api.Account",
        "Username":"",
        "Email":null
    },
    "IsDefault":false
    }
]
```

3.重新打开Sourcetree就不需要登录了
