centos内yum包内的mysql-utilities不是最新版的。所以通过编译的方式进行安装。

mysql-utilities-1.6.5是基于python2实现的，所以python不需要升级到3.

安装步骤

```
cd /usr/local/src
wget https://cdn.mysql.com/archives/mysql-utilities/mysql-utilities-1.6.5.tar.gz
tar xvf mysql-utilities-1.6.5.tar.gz
cd mysql-utilities-1.6.5
python setup.py build
python setup.py install
```

```
mysqldiff --version
```

```
[root@localhost ~ 16:01:39&&21]#mysqldiff --version
MySQL Utilities mysqldiff version 1.6.5
License type: GPLv2
```
