原文：

安装

```
#curl -o rmtrash.sh
https://raw.githubusercontent.com/BillWang139967/linux_tools/master/08_rm/rmtrash.sh
#mv rmtrash.sh /bin/
#chmod +x /bin/rmtrash.sh
#/bin/rmtrash.sh
#source ~/.bashrc
```

如果想对全局所有用户启用回收站，需要修改bashrc全局配置文件后即可：

```
echo "alias rm=/bin/rmtrash.sh" >>/etc/bashrc
```

使用

```
rm -h
```

Usage: rm file1 [file2] [dir3] [....] delete the files or dirs,and mv them to the rmtrash recycle bin

rm is alias to rmtrash.sh.

options:

-f mv one or more files to the rmtrash recycle bin

-r mv one or more files to the rmtrash recycle bin

-fr mv one or more files to the rmtrash recycle bin

-rf mv one or more files to the rmtrash recycle bin

-R Restore selected files to the originalpath from rmtrash recycle bin

-i show detailed log of the deleted file history

-d delete one or more files by user's input file name from the trash

-e empty the rmtrash recycle bin

-h display this help menu

功能说明

彻底删除文件

```
# rm -e 清空回收站
# /bin/rm file 直接删除文件而不经过回收站
```
